

Building and Growing Our Future Together

Forward Motion Insider Update - October 23, 2019

Dear Insider,

Next time you're driving by GCS at 110 Boston Road, you'll notice a temporary fence surrounding the school grounds, a construction trailer, an oversized dumpster, and various contractor vehicles – the **Forward Motion Project** is officially underway!

Our skilled and professional general contractor, RP Masiello, equipped with the beautiful architectural plans and detailed design of Maugel Architects, has formally kicked-off the demolition phase of our **Forward Motion Project**.

Recent photos of the interior of the school building reveal an almost unrecognizable, stripped-down version of our home base. With walls removed, it's difficult to imagine our old familiar layout of color-themed classrooms and cozy spaces. However, we embrace this change as the necessary and exciting first step to realizing long-imagined improvements to our school: updated classrooms, a Children's Library and Technology Center, a welcoming reception area, and meeting spaces for teachers and families. This newly renovated, state of the art space will be ready to welcome GCS children for the 2020-21 school year.

Thank you for your ongoing support of **Forward Motion**. We appreciate your help in spreading the word about our progress and continuing fundraising efforts for this first phase of the campaign (see gcsforwardmotion.org for more information and updated photos). We'll continue to keep you informed about our progress!

With gratitude,

Debbie MacDonald, co-chair Forward Motion Campaign
