

Building and Growing Our Future Together

Forward Motion Insider Update - November 27, 2019

Dear Insider,

As we pause to enjoy Thanksgiving with family and friends, I want to express our deep gratitude for your support of the **Forward Motion Building Project**. We're making progress at 110 Boston Road, and we're thankful for your role in helping us begin this transformation.

For more details about progress on the construction site, John Amaral (President, GCS Board of Trustees) shared this description:

"The construction phase of the **Forward Motion** project is underway! The construction permit has been issued. We meet every other week with the GC project manager and site supervisor, architects and representatives of GCS to review work completed to date and the project schedule. Demolition of the interior of the existing building is complete with only the shell remaining. Site work is progressing, as evidenced by the large mounds of material on the site. Footings for the foundation will soon be poured. Over the next few weeks, framing of the interior of the existing building will take place and we will start to see the new building come up out of the ground."

Thank you for your ongoing support of **Forward Motion**, as well as your help in spreading the word about our progress on this first phase of the project. Be sure to visit our expansion website at gcsforwardmotion.org and click on our "**Moving Forward**" photo journal to see our progress unfold! All my best wishes for a wonderful Thanksgiving!

With gratitude,

Debbie MacDonald, Co-chair Forward Motion Campaign
